 Quick Start Guide
 Manual

Release version

There are 3 categories of worksheets, denoted by different colors:

- Essential Worksheets** (Scorecard, Group, Courses)
 - Used for editing scorecard attributes, players and courses
 - Must not be deleted or renamed!
- Printing Worksheets** (PRT S A4, PRT S2p A4, PRT S LTR, PRT S2p LTR)
 - Used for printing scorecards with preset formats
 - You can rename Worksheets or delete ones that are not being used
- Miscellaneous Worksheets** (Batch, Back side A4, Back side LTR, Prize Sheet)
 - Worksheets with supporting functions
 - You can delete Worksheets that are not being used

IMPORTANT: Copy & Paste Functions

MakeGolfScorecard is using lots of formulas and cell formatting. Overwriting that information may cause tool to not operate properly.

There is really no need to use Copy and Paste function in MakeGolfScorecard. All data can be entered manually or there are built in functions to transfer single or blocks of data.

If you decide on using Copy and Paste anyway, try to use it carefully and you must always use **Paste values only** or **Keep Destination Formatting** options while pasting your data.

Despite the fact that the default Paste function has been preset to paste values only. There are slight differences depending on the computer platform being used to run Excel.

PC Windows

For users running Excel on PC Windows the paste function is now automatically set to Paste values only. You can use standard Ctrl+C and Ctrl+V if needed.

Apple Mac

For users running Excel on Apple Mac the function is set to Control C (Ctrl+C) and Control V (Ctrl+V).

DO NOT use Command C and Command V shortcuts in Excel running on Apple Mac .

PREVIEW FLIGHT 2
First Flight
Up
Down

MakeGolfScorecard.com
 Quick Start Guide
 Manual

On this worksheet you can edit scorecard's default fields that will be used on all scorecards. You can also preview, print and browse through your finished scorecards from **PREVIEW FLIGHT Submenu**.

Event, **Comment 1** and **Comment 2** lines are text fields used to personalize your scorecard.

Date doesn't require any standardized date format entry, but as a regular text field will simply copy the field to scorecards.

Playing HCP sets what percentage of player's playing handicap will be used on scorecard. 100% HCP equals to full playing handicap as determined by player's handicap and golf course slope and index rating.

Playing HCP2 sets what percentage of playing handicap will be used on scorecard for players playing from alternative tees.

Player's source pop up determines the source of players for scorecards. There are two options – **Group** is being used to feed players from **Group Worksheet** or the other option is to use players from **Batch Worksheet**.

PREVIEW FLIGHT Submenu shows which flight is currently populating the scorecard and buttons First Flight, Up and Down will browse through your set of flights.

- **Mix 4-person:** randomly shuffles players in **PLAY Table** to create equally weighted 4 person flights based on their handicaps. In order to be able to create flights with similar handicap distribution no partial flights should be in **PLAY Table** before applying the **Mix 4-person** function.
- **Mix 2-person:** randomly shuffles players in **PLAY Table** to create equally weighted 2 person teams in flights based on their handicaps. Even number of players must be in **PLAY Table** in order this feature can function properly.

PLAY Table Playing Handicap column shows the exact playing handicap calculated from player’s handicap and course slope/index rating for selected course and tees.

Players can be also entered to **PLAY Table** individually without using **POOL Table**. In case that there is no need to keep players for future games in **POOL Table**, just enter each player’s name and handicap directly to **PLAY Table**.

Select Course Pop up selects which golf course will fill your scorecard.

Scorecard Tees Info Pop ups assigns specific Tees to each of three lines designated for Tee info.

Playing Tees Pop up specifies what tees players are playing from. This Tee will be highlighted on scorecard and slope and index rating will be used to calculate playing handicaps.

Select –Empty– if you want to use your handicaps as playing handicaps without course index adjustment.

Alternative Playing Tees Pop up specifies second set of tees for players playing from Alternative Tees. Names of players playing from this Tee will be altered on scorecard with this alternative tee name and their playing handicap will be adjusted accordingly. Alternative Tees option is set in **Group** or **Batch Worksheet**.

Hole Background Check Boxes will highlight selected holes with two different background colors. Can be used for highlighting specific holes for different game types.

Courses 1 – 10 Tables store all golf course info needed for scorecard. Course name with Tee names and distances of your playing Tees together with par, stroke index and course ratings must be entered in yellow fields.

Sub Batch 2

Scorecard Group Courses Print A4 Print 2p A4 Print LTR Print 2p LTR Batch Print Cover A4 Print Cover LTR Prize

Batch worksheet can be used to enter up to 144 players to populate your scorecards.

Player's Source must be switched to Batch in **Scorecard Worksheet** in order to feed players to scorecards from this source!

Enter or paste all your players to **BATCH TABLE**. The counter on top shows total number currently entered players.

All players from **BATCH TABLE** will be automatically copied to **PLAY TABLE** in sub batches of 24 players to fill scorecards. These sub batches are selected by pull down switch. The currently selected sub batch will be outlined in **BATCH TABLE** and will be copied to **PLAY TABLE**. In order to print all players from your batch select sequentially all sub batches, print each sub batch individually and keep repeating until you cover all players.
